

Steel service center selects Microsoft Dynamics NAV solution in order to keep up with rapid growth.

September, 2006 – Memphis

TN – BCS Industries LLC, a multi-facility steel service center selects JustMetalsERP to automate key business processes across three plant locations.

“BCS Industries has undergone rapid growth in recent years” offers Joseph Higdon, President of BCS. “In order to fully capitalize on our size and capabilities we need to implement consistent business processes across all locations providing better overall visibility of inventory, and position ourselves for future growth and better serve our customers”.

The six month implementation will automate Ohio operations; Cuyahoga, and Maple Heights, by end of year with the Memphis location to follow. The company’s financials and accounting operations will be live on JustMetalsERP in a matter of months. The scope of the three facility implementation includes Inventory, Sales, Purchasing, and Production.

“With JustMetalsERP, the Sales department in Memphis will have the ability to easily see inventory in all locations resulting in enhanced communication to customers”. Higdon continues “At the same time, the Purchasing department will be provided a more complete picture of existing orders, current inventory, work in process and future receipts allowing them to make better buying decisions”.

“We are pleased to have BCS join our family of customers” offers Marc DiGiorgio, VP of JustMetalsERP. “Customers like BCS are able to take advantage of Microsoft’s long term product direction, and seamless integration to applications their employees use every day, making JustMetalsERP and Microsoft the right solution for metals companies.”
